GARLINGHOUSE PLAN BOOKS

FOR MANY years we were engaged in the business of developing new additions and building homes of moderate cost. As the years went by, homes planned by us became very popular, not only in the city in which we lived, but in the surrounding country and neighboring cities. The demand for our homes was so great that we conceived the idea of publishing the plans for them in book form.

Our first book of residence plans was only a small pamphlet containing thirty designs and was published when bungalows were beginning to be popular, so we named the book "BUNGALOW HOMES."

We have now published seven different editions of "BUNGALOW HOMES," featuring some five hundred different designs, of almost every type of residence, both one and two story. Our entire time is now devoted to the study and developing of complete plans and the publishing of residence plan books.

Our books and plans have a world wide distribution. We have sold both plan books and complete plans in every state in the United States and in many foreign countries.

This year we are publishing three books of plans. These new books are: The Eighth Edition of "BUNGALOW HOMES," containing one hundred six designs; "GARLINGHOUSE MODEL HOMES," containing one hundred designs; and "GARLINGHOUSE SMALL HOMES," containing seventy-six designs; making a total of two hundred eighty-two different designs in the three books.

In these books of plans we have put forth our best efforts to serve you and hope they have proven, and will continue to prove beneficial to all who use them.

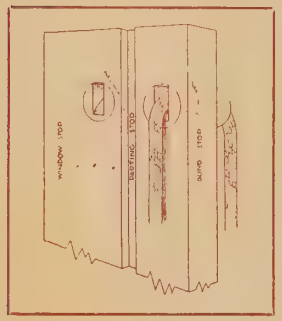
The Test of Good Building Nowadays is INSULATION

Just as the public accepted and demanded steel framework for sky-scrapers a generation ago, the modern man, seeking a permanent home, is demanding insulation today. INSO BOARD, dependable building insulation, is revolutionizing modern home building. Made of wheat straw fibers, long and sinewy, the material is 7/16 of an inch thick, four feet wide and is shipped in any length desired. It may be used either as sheathing or as a plaster base (INSO LATH). It is such effective insulation, it reduces fuel bills 1/3 (by actual test). Write the Stewart Inso Board Company, St. Joseph, Mo., today for a free series of booklets which will explain this product thoroughly to you.

INSO BOARD

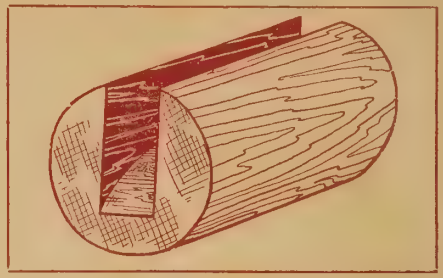
DEPENDABLE BUILDING INSULATION



Fool Proof

"We set up a machine that raised and lowered a 5-pound weight 53,000 times and after this operation the ordinary sash cord used on saddle showed practically no wear at all. This was equivalent to raising and lowering an ordinary average size window (30x26-1⅜ 2 Lts.) twice a day for over 70 years."

(Excerpt from letter from Lee & Lyman Lumber Co., K. C. Mo.)



SASH CORD SADDLES

On a 30 Pound Window Why Use 30 Pounds of Weight When 18 Pounds is All You Need

No flanges to cut or bind cord. No moving parts to stick or require oiling. No iron to rust. Noiseless, Beautiful, Labor Saving and **COST SAVING.** Made of Birch, Treated in Oil.

ATLAS BOARD
FIBRE-SIZED DIP PRIMED

ATLAS TILE
FINER FINISH SUPER STRENGTH

The Central Fibre Products Company through its Wallboard Division owns and operates one of the largest and most complete fibre wallboard factories in existence, which is located at Hutchinson, Kansas. The well known ATLAS and BISON board products are manufactured in this plant. For years, these products have been generally accepted in all trade territories as the standard of wallboard quality.

FOR BEAUTY

The uniform surface and creamy color of ATLAS BOARD is attractive if left natural but if preferred it may be decorated with ordinary paints or stains. ATLAS BOARD surfaces are dip primed preparatory for receiving the second coat of paint or enamel.

DURABILITY

ATLAS BOARD is manufactured from selected long fibres of Northern Spruce and its inherent toughness and rigidity lends permanent strength to your building.

CONVENIENT and ECONOMICAL

ATLAS BOARD comes in large flawless panels, light to handle and easy to install. It does not warp, check or crack. Its initial cost is exceptionally low and inexpensive to apply
